THE GODADDY CEILING

7 Things You'll Never Get from a Website Builder.

GoDaddy gives you a brochure for the internet. Pretty, static, disconnected from every system that actually runs your business. Here is exactly what you're missing — and what a professional platform delivers instead.

Live Integrations

GD: Embed codes. iFrames. Manual copy/paste between tools. None of your data flows automatically.

QL: Native, two-way API connections to your CRM, scheduler, QuickBooks, payment processor — real-time data sync with zero manual work.

Intelligent Lead Capture

GD: Basic contact form → email notification. No scoring, no follow-up, no pipeline. You manually enter leads.

QL: Smart forms with conditional logic, auto-responders within 60 seconds, lead scoring, source attribution, follow-up sequences, and CRM pipeline insertion.

Full Payment Processing

GD: Stripe button or PayPal widget. No ACH, no recurring billing, no deposit splits, no invoice aging.

QL: Complete Stripe suite: one-time, recurring, ACH, deposit splits, auto-invoicing, payment reminders, aging reports, and QuickBooks sync.

Secure Client Portal

GD: Not possible. Password-protect a page at most. No per-client data, no document sharing, no messaging.

QL: Branded client login: project status dashboards, shared documents, invoice payments, real-time messaging, and role-based access control.

Real Business Analytics

GD: Visitor counts and page views from Google Analytics embed. Nothing tied to revenue or operations.

QL: Custom dashboards: CAC by source, close rate by service line, revenue per channel, team KPIs, proposal win/loss ratios — decisions from data.

Server-Side Automation

GD: Zapier duct-tape at $50–$200/mo that breaks on edge cases. No error handling. No retry logic.

QL: Built-in server automation: triggered workflows, background jobs, webhook handlers, retry with exponential backoff. Zero third-party dependencies.

Mobile & PWA

GD: Responsive template. Zero native capability. Cannot install on home screen. No offline access.

QL: Progressive Web App or native mobile builds. Home screen install, push notifications, offline caching, and native-feel performance.

"We tried GoDaddy for 8 months. Spent more time fighting the platform than running our business."

QuantLab SOFTWARE SOLUTIONS

QuantLab Software Solutions

Built by Engineers. Owned by You.

Stop wrestling with DIY platforms that were never designed to run your business. Get a system that works as hard as you do.

Why GoDaddy Is Costing You More Than It Saves.

The hidden fees, the broken integrations, the leads that fall through the cracks, and the revenue you're leaving on the table — all because a template was never designed to run a business.

- **78% of buyers choose the first business to respond — your template can't auto-respond**
- **GoDaddy's real annual cost exceeds $24,000 after hidden fees & lost time**
- **You cannot connect your CRM, scheduler, or invoicing to a template**
- **Your data is locked on their servers — migration costs thousands**
- **Your competitors are already on custom-built, professional platforms**
- **Every week you spend fighting a template is a week you're not growing**

OPEN THIS BROCHURE TO SEE THE FULL BREAKDOWN →

THE REAL PRICE TAG

GoDaddy looks cheap. It isn't. Not even close.

The $12/mo plan is a loss leader. By month 3, you're stacking premium, e-commerce, marketing, and SEO add-ons — all billed separately, none of them talking to each other. Here's the real math:

FEE CREEP — $4,800/yr

- → Base plan: $12/mo → $25/mo after trial
- → Email marketing: $10–$40/mo
- → SEO tools premium: $7/mo
- → Phone support upgrade: $15/mo
- → E-commerce add-on: $25/mo
- → SSL certificate: included (but limited)
- → Online scheduling: $10/mo

Before you've built anything real, you're spending $400/mo on disconnected tools.

YOUR TIME — $7,200/yr

- → Learning the editor: 20+ hours upfront
- → Updating plugins and content: 4 hrs/mo
- → Managing email/scheduling separately: 3 hrs/mo
- → Fighting mobile breakage: 3 hrs/mo
- → Troubleshooting broken layouts: 2 hrs/mo

12+ hrs/month at your $50/hr billable rate = $7,200/yr doing IT work instead of running your business.

LOST REVENUE — $14,400/yr

- → No auto-responder: leads go cold in 5 min
- → No follow-up sequences: 80% of sales need 5+ touches
- → No client portal: competitors who have one win the trust game
- → No lead scoring: you treat $500 and $50K leads the same
- → No source tracking: you can't optimize what you can't measure

30% of your leads are going to competitors who respond faster and look more professional.

PLATFORM LOCK-IN — $5,000+ exit

- → Your content is trapped in their proprietary format
- → SEO rankings lost during migration
- → Re-building takes 2–4 months minimum
- → No code export — you start over from scratch
- → Domain transfer fees and DNS downtime

When you outgrow GoDaddy (you will), escaping costs thousands in developer hours, lost rankings, and downtime.

TRUE YEAR-1 COST OF GODADDY
A professional platform pays for itself in 60–90 days.
$31K+

FEATURE COMPARISON

GoDaddy vs. QuantLab — Every Single Category.

CATEGORY	GODADDY	QUANTLAB
Design Freedom	100 templates. Change one thing, break the rest.	Pixel-perfect custom design. Your brand, your rules. Zero template limits.
Page Load Speed	3–6 sec load. Bloated scripts, shared hosting.	Sub-2s guaranteed. Server-side rendering, CDN, optimized assets.
Lighthouse Score	40–65 typical. Kills SEO ranking.	95+ guaranteed. Performance, accessibility, best practices.
SEO Capability	Basic meta tags. No structured data. Slow rendering tanks rank.	SSR, schema markup, sitemaps, Core Web Vitals optimized, dynamic OpenGraph.
CRM & Leads	None built in. Third-party widgets that don't sync.	Full CRM: pipeline, scoring, attribution, follow-up automation, close rate analytics.
Payments	Basic Stripe button. No ACH, no recurring, no invoicing.	Complete payment suite: cards, ACH, subscriptions, auto-invoicing, aging reports.
Client Portal	Not possible. Password-protect a page at most.	Branded login. Project status, docs, payments, messaging — all per-client.
Custom Logic	Zero. What the template gives you is all you get.	Anything: pricing calculators, booking flows, approval workflows, dashboards.
Security	Shared hosting. Basic SSL. No monitoring or RBAC.	RBAC, encryption at rest/transit, Sentry monitoring, OWASP best practices.
Scalability	Hits a wall. Rebuild everything to grow.	Architected to scale. Add users, features, integrations—no rebuilding.
Data Ownership	Their servers, their terms, their rules.	You own 100% of code and data. Deploy anywhere. No lock-in.
Ongoing Cost	$200–500/mo recurring, rising annually.	One-time build. Hosting ~$20/mo. Updates as needed.

0/12 GODADDY WINS

12/12 QUANTLAB WINS

THE PROFESSIONAL ALTERNATIVE

Stop Renting a Template. Start Owning a Platform.

GoDaddy built their business to charge you monthly — forever. We build once, you own it forever. Every feature integrates with everything else. Your investment compounds — not your bill.

Engineered Around YOUR Workflow
Not a template stretched to fit. Every screen, every button, every automation is designed around how your team actually works. Estimates, client follow-up, payment collection, project tracking — unified, not duct-taped.

Every Feature Compounds ROI
On GoDaddy, each new need means another paid plugin that doesn't integrate. On your platform, each new feature connects to the existing system — multiplying value, not adding monthly costs.

Instant Credibility. Real Results.
83% of buyers judge a company by its website before the first call. A custom platform with client portal access, blazing speed, and professional design positions you as the industry leader — because you look like one.

100% Ownership, Zero Lock-In
The code is yours. The data is yours. Deploy to any server you choose. Hire any developer to maintain it. No platform dependency, no monthly extortion, no surprise price hikes. Total freedom.

Enterprise Security from Day One
Role-based access control, encrypted data at rest and in transit, automated backups, security monitoring, and OWASP-compliant code. Your clients' data is protected — and so is your reputation.

FROM FIRST CALL → LIVE PRODUCTION

Week 1	Wk 2–4	Wk 5+
Free strategy call. We scope your vision, map your workflow, and deliver a fixed-price quote within 48hrs.	Build in focused sprints. Weekly demos every Friday. Your feedback shapes every decision. No black box.	Launch to production. Full team training. 90 days of included support. You're never left on your own.

Ready to stop renting?

Free 30-min strategy call. We'll show you exactly what your business platform will look like — and give you a fixed-price quote on the spot.
