THE GODADDY CEILING

7 Things a Template Can't Do for a Towing Operation.

GoDaddy gives you a pretty page. It can't dispatch a truck, track a repo, manage a lot, or send an invoice. You're paying $200+/mo for a CRM that doesn't talk to your website. Here's everything you're missing:

Live Dispatch Board

GD: No dispatch. You're juggling calls, texts, and whiteboards. Every handoff is a chance to drop a job.

QL: Real-time dispatch: drag-and-drop assignment, priority queuing, driver status tracking, auto-routing to nearest unit — one screen.

Built-In CRM & Lead Tracking

GD: Separate CRM at $79–$300/mo (Towbook, HubSpot, etc). Doesn't sync with your site. Double data entry.

QL: Native CRM: leads from your site flow directly into pipeline. Account management, contact history, scoring, follow-up automation — zero extra cost.

Automated Invoicing

GD: Manual QuickBooks or Word docs. 15–25 min per invoice. Days late. Rate card errors. No online payment links.

QL: Auto-generate invoices on job close with your rate cards. Stripe (card + ACH). Aging dashboard. Auto-reminders. QuickBooks sync.

Digital Condition Reports

GD: Paper forms. Photos lost in camera rolls. No timestamps. No GPS. Useless in court.

QL: Mobile photo capture: timestamps, GPS location, damage annotations. Auto-attached to vehicle file. Searchable. Court-ready.

Client / Lender Portal

GD: Not possible. Clients call you for every status update. You play phone tag with lenders all day.

QL: Branded self-service portal: clients see job status, view photos, download docs, approve charges, pay invoices — 24/7.

Operations Analytics

GD: You know you're busy. That's it. No data on response times, revenue per truck, or account profitability.

QL: Dashboards: revenue per truck, avg response time, close rate by account, lot utilization, driver performance, monthly trends.

Driver Mobile App

GD: Drivers get texts. No structured info. No photo upload. No status updates. No offline capability.

QL: PWA: accept jobs, navigate, capture photos, update status, collect signatures. Works offline in dead zones.

"We were paying $300/mo for Towbook + GoDaddy + QuickBooks. Now it's all in one system we own. The CRM alone saved us $3,600/yr."

QuantLab
SOFTWARE SOLUTIONS

QuantLab Software Solutions

Operations Software. CRM Included. No Extra Cost.

We build the platforms that run towing & repo operations — dispatch, CRM, fleet tracking, invoicing, client portals, and analytics — all in one system. No separate CRM subscription. Ever.

GoDaddy + CRM Is Bleeding Your Towing Company Dry.

You're paying GoDaddy for a website that can't dispatch a truck. You're paying $79–$300/mo for a CRM that doesn't talk to it. And you're still doing invoices by hand. There's a better way.

- ✕ **GoDaddy + CRM + invoicing = $400–$700/mo in disconnected tools**
- ✕ **Your CRM doesn't sync with your website — every lead is manual entry**
- ✕ **No dispatch, no GPS tracking, no driver app — just a template**
- ✕ **Condition reports are stuck in camera rolls — useless in disputes**
- ✕ **Lenders & accounts can't self-serve — you're drowning in status calls**
- ✕ **One platform replaces it all: website + CRM + dispatch + invoicing**

OPEN TO SEE THE FULL COST BREAKDOWN & SOLUTION →

THE REAL PRICE TAG

GoDaddy + CRM Looks Cheap. Here's the Real Math.

The $12/mo GoDaddy plan is a loss leader. Add a CRM, invoicing, scheduling, and the time you burn gluing it all together. Here's what towing & repo operators actually spend:

STACKED SUBSCRIPTIONS — $7,200/yr

- → GoDaddy website: $25–$45/mo after promo ends
- → QuickBooks invoicing: $30–$80/mo
- → Scheduling/forms: $10–$40/mo
- → CRM (Towbook/ProTow): $79–$300/mo per user
- → Email marketing: $20–$50/mo
- → None of these systems talk to each other

You're paying 5+ vendors $600/mo for tools that don't integrate. Every lead, every invoice, every update is entered manually — twice.

WASTED ADMIN HOURS — $9,600/yr

- → Re-keying leads from website into CRM: 30 min/day
- → Photo management across camera rolls: 15 min/day
- → Assembling reports for accounts: 3+ hrs/week
- → Manual invoicing + rate card lookups: 20 min/job
- → Answering lender status calls: 2+ hrs/day

16+ hrs/week doing data entry your platform should handle. At your $50/hr rate, that's $800/mo in admin overhead.

LOST REVENUE — $8,400/yr

- → No auto-dispatch: slow response loses motor club calls
- → No client portal: lenders choose competitors who have one
- → No lead auto-response: 78% of buyers pick the first responder
- → No analytics: you can't prove SLA compliance to keep accounts

Every contract lost to a competitor with a real platform costs $1K–$5K/mo. One lost account pays for your entire build.

CRM LOCK-IN TAX — $3,600/yr

- → Your data is trapped in Towbook/ProTow's proprietary format
- → Price hikes every year with no alternative
- → No export = rebuilding from scratch if you switch
- → You're renting access to YOUR OWN business data

You'll never stop paying — and they know it. One platform you own eliminates CRM costs permanently.

TRUE YEAR-1 COST OF GODADDY + CRM — **$28K+**

A unified platform pays for itself in 60–90 days and eliminates CRM fees forever.

FEATURE COMPARISON

GoDaddy + Separate CRM vs. One QuantLab Platform.

CATEGORY	GODADDY + CRM	QUANTLAB
CRM & Lead Mgmt	Separate $79–300/mo CRM. Manual lead entry from website. No sync.	Built-in CRM: auto-capture from website, pipeline, scoring, follow-up automation. $0 extra.
Dispatch System	Not available. Calls managed via text/phone/whiteboard.	Real-time dispatch board. Drag-drop assign. Auto-route nearest truck. Status tracking.
GPS Fleet Tracking	Separate GPS vendor at $25–$40/truck/mo.	Live map integrated into dispatch. Click-to-assign. Geofence alerts. Route history.
Invoicing	QuickBooks ($30–$80/mo). Manual creation. No rate card integration.	Auto-invoice on job close with rate cards. Card + ACH. Aging reports. QB sync. $0 extra.
Client Portal	Impossible. Clients call for every update.	Branded portal: status, photos, docs, payments — 24/7 self-service.
Condition Reports	Paper + camera roll. Lost photos. No timestamps.	Mobile digital capture: GPS, timestamps, damage tags. Auto-attach to record.
Driver App	Text assignments. No structure. No offline.	PWA: accept, navigate, photo, status, signatures. Offline-capable.
Analytics	Spreadsheets. No real-time data.	Dashboards: revenue/truck, response times, account profitability, trends.
Lot Management	Walk the yard. Paper log.	Digital lot map, storage counters, lien alerts, auction prep, chain-of-custody.
Data Ownership	Locked in 2+ vendors. No export.	You own 100% of code AND data. Deploy anywhere. No lock-in.
Integration	Nothing talks to anything else.	Every feature connects to every other feature — one unified system.
Monthly Cost	$400–$700/mo in stacked subscriptions, rising annually.	One-time build. Hosting ~$20/mo. CRM included forever.

0/12 GODADDY+CRM WINS

12/12 QUANTLAB WINS

ELIMINATE CRM COSTS FOREVER

Stop Paying $300/mo For Someone Else's Software.

Towbook, ProTow, HubSpot — they charge monthly because they can. You're renting access to your own business data. We build you a platform with a full CRM baked in. You own it. CRM costs drop to $0. Permanently.

CRM Included at Zero Extra Cost

Full pipeline management, lead auto-capture from your website, account histories, contact logs, follow-up automation, and scoring — built into the same platform as your dispatch, invoicing, and portal. No separate vendor. No monthly fee.

Built Around YOUR Towing Workflow

Not a generic CRM squeezed into your process. We map your actual dispatch flow — rate cards, lien timelines, lot layout, driver assignments — and build a system that matches how your team actually works, minus the bottlenecks.

Every Feature Compounds ROI

Dispatch auto-creates the invoice. Invoice links to the CRM record. Client portal pulls from the same data. Unlike 5 separate tools, every feature multiplies the value of the platform — not your monthly bill.

Win Contracts With Credibility

When a lender or motor club evaluates you, they see a professional platform with a client portal, real-time tracking, and instant analytics. That credibility wins contracts that the guy with GoDaddy + spreadsheets never gets.

100% Ownership. Zero Lock-In.

The code is yours. The data is yours. No platform dependency, no monthly hostage fees, no "we're raising prices." Deploy anywhere. Hire any developer. Total freedom.

CRM Savings: $3,600–$14,400/yr

Eliminate Towbook/ProTow/HubSpot subscriptions permanently. Your CRM is built into the platform you own.

Ready to ditch the CRM bill?

Free 30-min strategy call. We'll show you exactly what your unified platform looks like — and give you a fixed-price quote.
