

The Web App Pentest Checklist (OWASP-aligned)

An 80-item OWASP-aligned checklist for CTOs, security leads, and SaaS founders preparing for SOC 2 or a customer security review.

Coming soon. The full version of this resource is in production and will be sent directly to subscribers as soon as it ships. In the meantime, William Beltz personally reviews each lead-magnet download and is happy to send the relevant section of the working draft, answer scoping questions, or set up a working session walking through the framework on your specific situation.

To request the working draft, an annotated walk-through, or a 20-minute scoping call, contact us using the details below.
